

CNR SUBJECT INDEX TO VOLUME 3

- Advanced glycation end products (AGEs) 73
 as anti-fibrinolysis 75
 effect on hypercoagulability 74
 in thrombotic abnormalities in diabetes 73
- Aging 15,181
 as neuroprotective during global ischemia 181
 cerebral angiogenesis in 15
 effect of exercise 15
 expression of angiogenic factors in 15
- Akt 107
 neuroprotection by 107
 substrates of 107
- Alzheimer's disease (AD) 289
 capillaries in 289
- β -Amyloid (A β) 289
 clustering of 290
 in large diameter blood vessels 289
- Angiogenesis 16,119,238
 degradation of extracellular matrix in 125
 extracellular matrix (ECM) in 240
 FGF in 239
 immunocytochemistry of 16
 in arteriovenous malformations (AVMS) 242
 in brain tumors 241
 in cavernous malformations 242
 initiation of 238
 integrins in 240
 mechanisms in ischemic brain 122
 migration of endothelial cell/luminal
 formation in 121
 mitogens for endothelial cells in 123
 molecules involved in 119
 platelet derived growth factor (PDGF) in 240
 replication of endothelial cells in 119
 role in stroke 121
 stereological analysis of 16
 therapeutic based 125
 VEGF in 239
- Angiogenic factors 16
 overexpression of 18
 real time RT-PCR analysis for detection of 16
- Angiopoietins 239
- Apoptosis 25,251
 assessment of neuronal survival in 26
 by DAPI staining 251
- Apoptotic cells 42
 determination of 42
- Autoantibodies 149
 in autism 153
 in autoimmune thyroid disease 150
 in celiac disease 153
 in chronic fatigue syndrome 153
 in post-streptococcal diseases 151
 in psychiatric diseases 153
 in psychiatric disorders related to
 autoimmune diseases 149
 in psychiatric disorders related to infectious/
 non infectious disease 151
 in psychiatric disorders related to
 substance abuse 154
- in schizophrenia 153
 in systemic lupus erythematosus 149
- Blood pressure (BP) 131
- Brain 266
 expression of TNF- α receptors I/II in 266
- Brain damage 263
 effect of exercise preconditioning 263
- Brain endothelial cell apoptosis 249
- Brain energy depletion 203
 role of nicotinamide 203
- Bromodeoxyuridine (BrdU) 26
 assessment of 26
- Capillary-derived nestin-positive cell 3
 cellular phenotyping of 4
 delimitation of infarct zone by 3
 immunohistochemistry of 4
 in aged rats 3
 in cells around blood vessels 9
 in infarct core 9
 in vascular wall 9
 in ventricular wall 9
 role in neurogenesis in infarcted area 11
 use of real-time RT-PCR 4
- Carotid artery intima-media thickness 100
- Caspase 3 34
 inhibition of 34
- β -Catenin 107,187
 immunocytochemistry of 189
 substrates of 187
- CD40 expression 43
 role of western blotting 43
- Cellular prion protein (PrP^c) 215
 in epileptic events 221
 in neuroinvasion 221
 in oxidative stress 216
 in prion diseases 219
 interactions with copper ions 216
 neuroprotective function of 217
 role in adhesion/neuritogenesis 216
 role in BAX/DOPPEL induced cellular death 218
 role in memory consolidation 217
 T lymphocytes/cellular differentiation of 218
- Central nervous system (CNS) 237,307
 acetylcholinergic plus monoaminergic
 circuitry in 307
 ACh-neuronal system in 307
 activated pathways in 240
 adrenergic circuitry in 309
 angiogenesis in 237
 endothelial cell diversity in 240
 monoaminergic circuitry in 308
 new vessel formation in 237
 noradrenergic circuitries in 309
 noradrenergic circuitry in 308
 vasculogenesis in 237
- Cerebral hemorrhage 144

Cerebral ischemia	119	central nervous system circuitry/peripheral neural sympathetic activity in	307
Cerebral strokes	68	dorsal raphe serotonergic nucleus in	315
neuroadaptation in	69	median raphe serotonergic circuitry in	316
physiopathology of	68	noradrenergic A5 (sub-coeruleus) nucleus in	311
plasticity in	69	noradrenergic circuitry in	308
regeneration in	70	serotonergic circuitry in	313
Choroid	159	stress in	317
in systemic lupus erythematosus	159	Flow cytometry	42
vascular changes of	159	determination of CD40 expression with	42
C-reactive protein	99	Focal cerebral ischemia	203
determination of	100	in sprague dawley rats	203
endothelial colony forming capacity of	99	FOXO3a	107
levels in healthy subjects	99	Free radical injury	27
Cytokines	141	cell cycle induction in post-mitotic neurons during	27
as mediators of vascular changes during hypertension in pregnancy	141	GFAP-positive cells	9
Dehydroepiandrosterone	273	in vascular wall	9
in liver mitochondria	273	Glutamate- <i>L</i> -cysteine ligase (GCL)	249
in rat brain	273	catalytic subunit expression of	249
treatment alters lipid/phospholipid profiles	273	NRF2-dependent	249
Dimethylarginine dimethylaminohydrolase	49	insulin protection against hyperglycemia- induced	249
assay of	50	Glutathione-to-glutathione disulfide (GSH/GSSG)	249
endothelial activity of	51	S-Glutathionylation	251
expression in endothelial cells	49	determination of	251
high glucose-mediated imbalance of	49	Glycogen synthase kinase-3 β	187
1,3-Di- <i>o</i> -tolylguanidine (DTG)	89	inhibition of	192
dose quantification of	91	substrates of	187
induced enhancement of neurosurvival	91	Group I metabotropic receptor	107
to decreases expression of inflammatory markers	94	neuroprotection by	107
Doublecortin	9	Hippocampal neurons	181
in cells around blood vessels	9	apoptotic activity in	181
in infarct core	9	caspase-3 in	181
in ventricular wall	9	Human brain endothelial cells (IHEC)	249
Eclampsia	143	Human embryonic stem cells (hESC)	281
Endothelial progenitor cells	99	differentiation of	282
isolation of	100	Human motor neuron	284
Endothelin-1	81	production of	284
effect on retrograde axonal transport	81	Hyperglycemia-induced redox imbalance	253
effects on retrograde axonal transport in optic nerve	83	Hypertension	131
in retinal vessels	82	enhanced VSM contraction during	139
intravitreal injection of	82	Hypoxia/reoxygenation	263
Erythropoietin	187	Infarction	89
in prevention of β -catenin phosphorylation	192	immunohistochemistry/histochemistry of	90
in protection against OGD	190	Insulin	253
microglial cytoprotection by	191	phosphorylation of Akt/mTOR/p70S6K	253
pre/post-treatment of	189	translocation of	254
role in microglial integrity	187	Ischemia/reperfusion insult	57
role in phosphorylates microglial glycogen synthase kinase-3 β (GSK-3 β)	191	functional changes of	64
to maintain β -catenin in nucleus	193	repair ability of	64
to promote transfer of NF- κ B	193	vulnerability of	64
Essential hypertension	307		
acetylcholinergic plus monoaminergic circuitry in	307		
ACh-neuronal system in	307		
adrenergic circuitry in	309		

Ischemic damage	182	Nitric oxide synthase	49
assessments of	182	expression in endothelial cells	49
		high glucose-mediated imbalance of	49
Laminin	216	Nuclear factor- κ B	187
role in adhesion/neuritogenesis	216	integration of Akt by	187
Lovastatin	41	member expression of	189
effect on apoptosis	41	substrates of	187
effect on apoptosis induced by TNF- α			
CVECs	43	Oxidative Stress	107
effect on NO release	43	Bim in	107
effect on NOS activity induced by TNF- α		β -catenin in	107
in CVECs	43	FOXO3a in	107
effect on viability induced by TNF- α	43		
reduced expression of CD40 induced by		Phosphorylated Akt1	189
TNF- α in CVECs	43	expression of	189
to downregulates CD40 expression	41	Phosphorylated retinoblastoma protein (p-Rb)	28
		in post-mitotic neurons during free radical	
mGluRI	113	injury	28
activation of	113	Placental ischemia	141
Middle cerebral artery	89	link to endothelial/VSM dysfunction	141
fluoro-jade histochemistry of	90	Post-mitotic neurons	25
occlusion in rats	89	cell cycle induction in	25
Mitochondria	274	effect of caspase 3	25
isolation of	274	effect of E2F1	25
Morphine	171	effect of Rb	25
cell proliferation/apoptosis assay of	172	expression of p-Rb during early/late	
role in mouse retinal endothelial cells	171	indicator of	30
to stimulate STAT phosphorylation	173	in early/late apoptotic programs	25
to stimulates Fik-1/KDR/PDGF receptor β			
phosphorylation	177	Pre-eclampsia (PE)	131
to stimulates vascular endothelial growth		baroreflex during	133
factor-like signaling	171	EDHF production during	138
Motor neurons	281	endothelial cell dysfunction during	135
derivation of	281	endothelium-derived contracting factors in	139
effect of Wnt3A/BMP-2	285	enhanced VSM contraction during	139
from clonal human embryonic stem cell lines	281	hemodynamic changes during	133
immunofluorescence studies of	283	neuronal control of BP during	133
RT-PCR analysis of	283	neurovascular consequences of	143
Mouse retinal endothelial cells	171	NO production during	137
isolation/culture of	171	PGI ₂ production during	138
Moyamoya	237	possible placental factors during	143
antiangiogenic therapy for	242	role of ET-1 in	139
new vessel formation in	237	role of oxidative stress during	142
Myelinated nerve fibers	55	role of TXA2 in	139
function of	55	vascular control of BP during	135
in rabbit eye	55	vasoactive neurohumoral factors in	135
role in ischemia/reperfusion injury	55	VEGF production during	138
structure of	55		
		Pregnancy	131,133
Nestin-GFAP phenotype	11	baroreflex during	133
infarcted area in	11	hemodynamic changes during	133
Neuronal injury	33	neuronal control of BP during	133
prevention of Rb phosphorylation to maintain		neurovascular mechanisms of hypertension in	131
Rb/E2F1 binding	33	PKC of VSM during hypertension in	140
NF-E2-related factor 2 (Nrf2)	249	vascular control of BP during	135
Niacinamide	203	vasoactive neurohumoral factors in	135
in cerebral microperfusion	203	VSM [Ca ²⁺] _i during hypertension in	140
to reduces brain infarct volume	203	Prion protein	215
		biology of	215
		in prion diseases	219
		Prion scrapie (PrP ^{Sc})	218
		Proliferating nuclear antigen (PCNA)	26
		assessment of	26

- Psychiatric disorders 149
 autoantibodies associated with 149
- Rat optic nerve 81
 axonal injury in 81
- Rb/E2F1 complex 27
 immunoprecipitation of 27
- Retina 159
 in systemic lupus erythematosus 159
 vascular changes of 159
- Retinal arterial occlusion 57
 histopathological evidence of 57
- Retinal vascular system 56
 assessment of electrophysiological function in 56
 occlusion of 56
- Retrograde axonal transport 81
 in optic nerve 82
- Sema 3A 296
 effect on immune cells 296
 expression/structure of 296
- Sema4A 300
 effect on immune cells 300
 expression/structure of 300
 receptors/signaling of 300
- Sema4D/CD100 298
 effect on immune cells 298
 expression/structure of 298
 receptors/signaling of 298
- Sema6A 301
- Sema7A 301
- Semaphorins 295
 class III type 296
 class IV type 298
 immune type 301
 neuronal type 295
 receptors/signaling of 297
 to regulate primary immune response 295
 virus-encoded type 301
- Sigma receptor 89
 activation reduces infarct size 89
- Spinal cord injury 225
 pathophysiology of 229
 role of neutrophils in 230
 role of taurine in 225
- Stress inducible protein (STI-1) 217
- Stroke 3,144
 cell quantitation in 5
 nestin mRNA concentration in 5
- Stroke-induced neurogenesis 67
 in adult mammalian brain 67
 mechanisms of 67
 neuroadaptation in 69
 physiopathology of 67
- plasticity in 69
 regeneration in 70
- Systemic lupus erythematosus (SLE) 159
 animal models in eye research for 165
 central serous chorioretinopathy in 162
 choroidal changes in 161
 choroidopathy in 161
 clinical findings in 161
 erythematosus 159
 ocular manifestations of 159
 pathogenesis of 159,163
 retinal vascular changes in 159
 role of antiphospholipid antibodies 164
 role of complements 164
 role of immune-complex deposition 164
 vasculitis associated with 160
- Taurine 225
 accumulation/release/transport/metabolism of 227
 analogs of 231
 as therapeutic agent 231
 availability in spinal cord 228
 biosynthesis of 227
 chemistry of 226
 modifier of 227
 pharmacological/physiological action of 228
 regulation of 227
- Thrombogenic abnormalities 74
 in diabetes 74
 platelet activation in 74
 role of ages in 74
- TIMP-1 100
 determinations of 100
- TNF α 41
 in cerebral vascular endothelial cells 41
- TNF- α receptors I/II protein 266
 in serum 266
 soluble expression of 266
- Transcription factor E2F1 31
 expression of 31
- Tumor growth 237
 new vessel formation in 237
- Tumor necrosis factor- α (TNF- α) 263
 receptor expression of 263
- Uteroplacental circulation 132
 during normal pregnancy/PE 132
- Vascular malformations 237
 antiangiogenic therapy for 242
 new vessel formation in 237
- VEGF 100,173
 determinations of 100
 effect of morphine 173
 to stimulate STAT phosphorylation 173
 to upregulates MOR RNA 177
