

## SUBJECT INDEX TO VOLUME 1

<p>Acyl glucuronides .....254</p> <p>Amaryllidaceae alkaloids .....331  HPLC/HPTLC analysis of .....331</p> <p>Apoptosis .....265</p> <p>Auxins .....334  HPLC of .....334</p> <p>Bacterial phytohormones .....334  HPLC of .....334</p> <p>Benzofurazan .....57  fluorescent chiral derivatization reagents  possessing .....57</p> <p>Bioactive metabolites .....329  analytical methods of .....329  HPLC/HPTLC methods for .....330  immunochemical methods for .....342  mass spectrometric methods for .....340  produced by plants/microorganisms .....329</p> <p>Biochemical markers .....225  novel osteoclastogenesis markers in .....235  of bone formation .....228  RANK/RANKL/OPG system in .....235  zoledronic acid as .....237</p> <p>Biomedical analysis .....127  role of microdialysis in .....127  sampling approach for .....127</p> <p>Bisphosphonates .....236  as therapeutic agents .....236</p> <p>Bone remodeling biomarkers/assays .....227  screening by .....227</p> <p>Bone remodeling cycle .....226  physiology of .....226</p> <p>Bone sialoprotein .....234</p> <p>Breast bone cancer disease .....234  diagnostic value of Bap/NTx in .....234</p> <p>Cancer-induced bone disease .....226  physiology of .....226</p> <p>Cancer-induced skeletal complications .....236  markers in .....236</p> <p>Capillary electrophoresis .....41  affinity .....51  approaches for high throughput .....43  data analysis of .....42  frontal analysis by .....48  Hummel-Dreyer method in .....51  physicochemical profiling by .....41  principles of .....41  vacancy affinity capillary electrophoresis in .....52  vacancy peak method in .....51</p> <p>Carboxylic acid .....58  reagents for .....58</p>	<p>Carcinogenesis .....109  by chlorinated pesticides .....113  by drugs .....123  by hexachlorocyclohexane (HCH) .....111  by pharmaceuticals .....123  by phosphorous pesticides .....114  by polychlorinated biphenyls (PCBS) .....109  by polynuclear aromatic hydrocarbons (PAHS) ..114  by xenobiotics .....121</p> <p>Chemometrics-assisted methodologies .....152</p> <p>Chemometrics-assisted spectrophotometry .....149,152</p> <p>Chiral alcohols .....61  reagents for .....61</p> <p>Chiral amines .....59  reagents for .....59</p> <p>Chiral ketone .....62  reagents for .....62</p> <p>2-Chloroadenosine .....265  as cytostatic drug in PC3 .....268  as nucleoside analogue .....265  cytostatic effect of .....265  in human prostate cancer cell line .....265</p> <p>Chromatography .....5</p> <p>Coil column countercurrent chromatography  (CC/CCC) .....309  evaluation on scale up of .....317  scale-up of .....309</p> <p>Crosslinked telopeptides .....232  of type I collagen .....232</p> <p>Cyclodextrins (CDs) .....52  inclusion complex constant of .....52</p> <p>Cyclopaldic acid .....343  production of polyclonal antibodies for .....343</p> <p>Cytochalasins .....332  HPLC/HPTLC analysis of .....332</p> <p>Cytokinins .....341,345  FAB-Tandem mass spectrometry of .....341  immunoassay of .....345</p> <p>Diastereomeric glucuronides .....255  chromatographic considerations for .....261  estimation of .....255,259</p> <p>DNA biosensor .....217</p> <p>Drug-protein binding constant .....47</p> <p>Electrochemical biosensors .....217  as screening tool .....217  to study <i>in vitro</i> DNA-drug interaction .....217</p> <p>EMP metabolites .....198  use of gas chromatography for determination  of .....198  use of liquid chromatography for determination  of .....199</p>
--	--

use of thin layer chromatography for determination of .....	198	for analysis of natural products .....	135
Enantioselective toxicity .....	109	indigo analysis of .....	142
by chlorinated pesticides .....	113	ions analysis of .....	143
by drugs .....	123	iridoids analysis of .....	143
by hexachlorocyclohexane (HCH) .....	111	lipids analysis by .....	138
by pharmaceuticals .....	123	principles of .....	135
by phosphorous pesticides .....	114	saponins analysis by .....	139
by polychlorinated biphenyls (PCBS) .....	109	terpenes analysis of .....	140
by polynuclear aromatic hydrocarbons (PAHS) .....	114	Experimental ACD .....	87
by xenobiotics .....	121	action of cytokines/chemokines in conjunctiva in .....	89
Endothelin receptors .....	93	action of infiltrating inflammatory cells in conjunctiva in .....	88
antagonists of .....	93	effects of exogenous eotaxin/IL-4 in .....	89
in arterial hypertension .....	103	regulation of infiltrating inflammatory cells in .....	89
in cancer .....	97	role of cytokine knockout mice in .....	87
in chronic liver disease .....	104	role of local cytokines for development of .....	88
in chronic renal failure .....	101	role of passive immunization in .....	87
in heart failure .....	99	Fiber solid-phase microextraction .....	66
in osteoblastic metastasis .....	98	Fluoroquinolones .....	155,283
in prostate cancer .....	98	analytical methodology for .....	166,283
in proteinuria .....	102	analytical techniques used for .....	155,184
in radiocontrast agent toxicity .....	103	antimicrobial activity of .....	156
in renal fibrosis .....	102	application to real samples .....	304
in renal ischemia .....	101	as human medicine .....	160
in renal protection .....	101	as veterinary medicine .....	160
in restenosis after angioplasty .....	105	chemical structure of .....	283
in stroke .....	104	chemistry of .....	156
Endothelin receptor antagonist .....	93	chromatographic analysis of .....	283
chemistry of .....	94	classification of .....	162
in pulmonary arterial hypertension .....	95	detection techniques for .....	303
liver toxicity by .....	94	determination of .....	155
other applications of .....	105	HPLC methods for .....	284
side effects of .....	94	in biological samples .....	283
teratogenicity of .....	95	in pharmaceuticals .....	155,283
Estradiol .....	196,200	mechanism of action of .....	161
Estramustine phosphate .....	195	members of .....	163
analytical methods for .....	195	method validation for .....	304
chemical properties of .....	195	pharmacokinetic characteristics of .....	161
chromatographic methods for .....	196	samples of biological origin of .....	155
determination of .....	195	structure/chemical characteristics of .....	156
metabolites in biological samples of .....	195	Fungal bioactive metabolites .....	336
non-chromatographic assay procedure of .....	196	HPLC analysis of .....	336
stability of .....	195	Fungal toxins .....	343
use of gas chromatography for determination of .....	198	ELISA for .....	343
use of liquid chromatography for determination of .....	199	flow cytometry for analysis of .....	343
use of thin layer chromatography for determination of .....	198	Fusaric acids .....	336
Estrone .....	200	HPLC analysis of .....	336
Evaporative light scattering detection (ELSD) .....	135	Gene expression .....	243
advantages/limitations of .....	137	DNA arrays of .....	246
alkaloids analysis of .....	142	methods of analysis of .....	243
amino acids analysis of .....	141	methods used to measure .....	245
and evaporation .....	136	mRNA differential display of .....	246
and nebulization .....	136	primer extension of .....	244
applications for natural products analysis of .....	138	quantification of .....	243
bile acids analysis of .....	142	quantitative RT-PCR of .....	244
carbohydrates analysis by .....	138		
detection by .....	137		

ribonuclease protection assay of .....	244	Imaging techniques .....	227
role of northern hybridisation in .....	243	diagnosis of bone metastasis by .....	227
role of SAGE in .....	246	Immobilized artificial membrane (IAM) .....	273
Glucuronidation .....	253	classes of molecular forces of .....	278
in xenobiotics metabolism .....	253	interactions with .....	278
Glucuronide conjugates .....	251	interfacial properties of .....	275
availability of reference standard of .....	259	N-in-one determination by .....	279
bioanalytical aspects in characterization of .....	251	partition coefficient measurement of .....	277
bioanalytical determination using LC-MS/MS		partition coefficient of .....	276
technique .....	259	profiling drug membrane transport <i>via</i> .....	273
bioanalytical determination using simple HPLC		retention factor of .....	276
techniques .....	255	Immobilized artificial membrane chromatography	
column switching technique for .....	260	(IAMC) .....	275
considerations for assay development/validation		immobilized artificial membrane surface in .....	275
requirements for biological samples		in BBB penetration .....	280
containing .....	259	in cellular uptake/penetration .....	280
direct estimation of .....	256,259	in intestinal absorption .....	279
estimation after derivatization .....	258	in skin penetration .....	280
estimation by using ion-pairing agent/ion-pair		profiling membrane transport <i>via</i> .....	279
HPLC .....	256	quantitative structure/retention/activity	
estimation of mixed type .....	258	relationships .....	280
in biological matrices .....	251	In-tube solid-phase microextraction .....	68
issue of dimerization .....	262	<i>L</i> -arginine .....	15
mass spectral detection of .....	261	assessment of nitric oxide synthesis from .....	17
matrix effects of .....	261	<i>L</i> -arginine/nitric oxide pathway .....	15
optimization of hydrolytic cleavage of .....	260	analysis of .....	15
quantification of .....	251	role of mass spectrometry in .....	15
racemization potential for .....	261	quantitative analysis of .....	18
stability considerations of .....	262	LC-MS/MS .....	3
Herbal extracts .....	203	development of .....	3
analytical methods for .....	207	matrix effects/recovery by .....	8
chemical stability testing of .....	203	method transfer in .....	12
factors influencing stability of .....	204	method validation of .....	9
in finished products .....	203	on-line extraction by .....	7
using state-of-art analytical methodologies		parallel analysis by .....	6
to study .....	203	rational method development strategy for .....	4
High-performance liquid chromatography (HPLC) ....	57,145	sample preparation in .....	4
as tool in pharmaceutical analysis .....	145	transfer for .....	3
resolution of optical isomers in .....	57	validation of .....	3
High-speed countercurrent chromatograph (HSCCC) ....	309	Lipodepsipeptides .....	338,345
scale-up by equipping with triple columns in		form <i>Pseudomonas tolaasii</i> .....	338
series .....	311	HPLC of .....	338
scale-up by larger diameter tubing .....	311	immunoassay of .....	345
scale-up by two stainless steel columns		LOGP <sub>ow</sub> profiling .....	44
connected in series .....	312	role of micellar electrokinetic chromatography in ..	45
with convoluted tubing .....	311	role of microemulsion electrokinetic	
Histone acetylation .....	319	chromatography in .....	45
high-accuracy mass measurement of .....	320	Mass spectrometry .....	15,320
identification by FT-ICR-ECD protein-		identification of histone acetylation sites by .....	320
sequencing .....	325	in analysis of nitrite/nitrate .....	19
identification by precursorion-scan .....	324	in discovering <i>L</i> -arginine-derived NO .....	16
qualitative/quantitative analysis of .....	319	in elucidating mechanism of NO formation .....	16
quantification of .....	325	of 3-nitro- <i>L</i> -tyrosine .....	24
use of mass spectrometry in .....	319	of dimethylamine .....	27
IFN- .....	90	of methylated <i>L</i> -arginine analogs .....	25
inhibition of IL-4 induced eosinophil		of <i>S</i> -nitrosothiols .....	22
infiltration by .....	90		

Medium-speed cross axis counter-current chromatographs .....	313	-Pyrone derivatives .....	337
scale-up of .....	313	HPLC analysis of .....	337
Metastatic bone disease .....	225	Seiridins .....	344
bone resorption biochemical markers in .....	230	use of ELISA/flow cytometry for identification of .....	344
bone-specific alkaline phosphatase in .....	228	Severe allergic conjunctival diseases (ACD) .....	85
glycosides in .....	231	(RTPCR) analysis of cytokine/chemokine/ expression in .....	87
hydroxylysine in .....	231	analytical techniques/quality parameters for .....	86
hydroxyproline in .....	231	experimental immune-mediated blepharocconjunctivitis as model of .....	86
osteocalcin in .....	229	involvement of cytokines on development of .....	86
procollagen I extension propeptides in .....	229	involvement of eosinophils in .....	85
pyridinium crosslinks of collagen in .....	232	mechanism of .....	85
role of bisphosphonates as therapeutic agents in .....	225	pharmaceutical/histopathological analysis of .....	85
total alkaline phosphatase in .....	228	roles of systemic cytokines for development of .....	87
urinary calcium in .....	230	roles of systemic/local cytokines in .....	85
Microdialysis .....	127	treatment with FK506 .....	90
in pharmacodynamic study .....	130	using experimental animal models .....	85
in pharmacokinetic study .....	128	Slow rotary counter-current chromatographs .....	314
principle of .....	127	Solid/phase microextraction .....	65
sampling in experimental animals .....	128	applications in clinical/pharmaceutical analysis .....	77
sampling in human .....	131	applications in forensic/toxicological analysis .....	73
sampling <i>in vitro</i> .....	127	applications in pharmaceutical/biomedical analysis .....	73
to study central nervous system .....	131	applications to contamination of pharmaceuticals .....	81
to study peripheral tissue .....	132	for pharmaceutical/biomedical analysis .....	65
Microextraction in packed syringe (MEPS) .....	71	in diagnoses of diseases .....	81
Multivariate calibration .....	145	related techniques of .....	65
as tool in pharmaceutical analysis .....	145	Solid-phase dynamic extraction (SPDE) .....	71
Nitric oxide (NO) .....	15	Stir Bar sorptive extraction (SBSE) .....	72
Nucleoside analogs .....	266	applications in pharmaceutical/biomedical analysis .....	73
PK <sub>A</sub> profiling .....	41	Systemic cytokines .....	87
Proteomics .....	31	Tandem mass spectrometry .....	323
artificial neural networks in .....	34	identification of acetylation sites by .....	323
chromatographic techniques in .....	32		
data processing in pI-based separation methods in .....	36		
peptides identification in .....	31		
predictions of HPLC peptide retention by .....	35		
use of analytical/bioinformatic strategies in .....	31
